

AIRCRAFT INTEGRATED NON-LETHAL WEAPON SYSTEM AINLWS

ABSTRACT OF THE DISCLOSURE

An aircraft integrated non-lethal weapon system AINLWS for commercial aircraft with a sealed bulkhead between the cockpit and the cabin. The cockpit has an air-conditioning system CAS separate from the cabin air-conditioning system PAS, the non-lethal weapon NLW material is injected into the cabin by a NLW supply system, and the cabin is exhausted, after securement, by an NLW exhaust system and the cabin returned to the cabin air system.
